

CONTACTLESS FREE STANDING BOTTLE FILLERS.

Bottle Filler

OASIS' CONTACTLESS BOTTLE FILLER has become FREE STANDING.

The Contactless Free Standing Bottle Filler uses infrared sensors for an easy, touch-free dispense. Eliminating any concerns of cross-contamination from pathogens and viruses. Providing users with quick and easy water from a safe source.

Freshield, a silver-based antimicrobial compound used in it's moulded components provides end-users with an added layer of safety; by reducing the growth of micro-organisms and mildew to protect the surfaces from discoloration, odours and degradation.

Available with Quasar UVC-LED. Quasar disinfects the water when it is being dispensed, eliminating the chance of recontamination and reducing over 99.99% of pathogens.

Non-refrigerated, refrigerated, and refrigerated with Quasar UVC LED units are available.

FEATURES

- Contactless activation with 20 second shut-off timer
- Plastic bottle filler components are infused with an antimicrobial Freshield
- High flow output (4LPM) for faster bottle filling
- Removable drip tray grill for easy cleaning
